The purpose of this packet is to teach census basics, so that a student could explain what they learn to someone else. All articles have been adapted to be accessible for students reading at grade-level-equivalent 4. Thanks to the National Coalition for Literacy for generously supporting the development of these materials.

Contents
- We Count, Count Us! 2
- Who Counts? Everyone! 3
- Still Undecided? Read This! 4
- Do People Feel Safe Enough? 5
- Activities 6-7
- Note to the Teacher 8

Steps
1. Support students to read pp. 2-4. Note key vocabulary and practice hard-to-pronounce words, eg. “representative.” Invite students to discuss what they learn in these pages, summarizing key points drawn from all the articles.
2. The article on p. 5 is written by a student who is concerned that people will be too afraid to fill out the census. Read this article with your students and do the activities. Note that he ends his article by saying that if people understood the census better, they might consider filling it out. He raises authentic concerns, and the After-You-Read activity (pp. 6-7) is designed to help students respond in an authentic way.

College and Career Readiness Standards
Read for details and main idea, write using evidence, sort details coherently, organize writing into paragraphs, use multiple sources, practice developing appropriate questions and verbally answering them, and add vocabulary.
**We Count, Count Us!**

*Jeannette Jimenez*

**BEFORE YOU READ:** Take the true or false quiz below. Then read the article to check your answers.

<table>
<thead>
<tr>

<tr>
<td>6. In 2020, you can only fill out the census questionnaire online.</td>
<td>F</td>
</tr>
</tbody>
</table>

In 2020, the U.S. government will hold a census. I want to make a call to all people. I want to tell all immigrants: Please participate! Do not be afraid!

The census counts **all the people** living in the country. This census tells the government how much money to give to each state. This money helps all people. If we do not participate in the census, we could lose money for our communities. This money helps create new schools, hospitals, fire stations, and more.

I want to tell my immigrant people that the U.S. Census Bureau will not share your information! They will not ask about your citizenship status. They will not ask if you are an immigrant. Your information is safe.

There is a law called Title 13. It says that the Census Bureau cannot share your information. For this reason, do not be afraid to participate.

There are many ways you can participate. You can complete the 2020 Census online, by telephone, in person, or by mail.

In the last census, we learned that in 2010, 11% of the people living in Washington, DC, were Latinos. In 2020, we know there are more Latinos in DC. How many are there? We need to find out.

Please participate in the census! We count, so count us!

**AFTER YOU READ:** Why does Jeannette want people to participate in the census?

Jeannette Jimenez is an ESL Hospitality student at the Carlos Rosario International Public Charter School in Washington, DC.
Who Counts? Everyone!

Cynthia Peters

BEFORE YOU READ: Make a list of everyone who lives with you. Write down their names and their relationship to you.

It is very important that we count everyone. But some people are not counted. People of color, immigrants, and people who are learning English are undercounted. Children are the most undercounted group. In 2010, the census did not count more than a million children under age five.

When people are filling out the census, they wonder: do children count? Yes, they do! Count all the children who live with you. They could be your own children or your grandchildren or your friend’s children. Count them all. If your baby is just one day old, count that baby!

Your community needs schools, health care, and housing. The census wants to get a big picture of who lives in the U.S. so they can plan for the next 10 years. The next census isn’t until 2030. Make sure to count everyone who lives with you!

AFTER YOU READ: Study the images on the right. Then check all the people in the list below that you should count when you fill out the census for your household.

☐ someone who is away at college
☐ all children (if they are living with you on April 1, 2020)
☐ babies born on or before April 1, 2020
☐ someone who is away in the military
☐ non-family members who live with you most of the time
☐ foreign-born people who live with you
☐ a child who splits time with you and another parent and is staying with the other parent on April 1, 2020

* All these people will still be counted, just not by you.

Download a free lesson packet (#21) for ESOL students on filling out the census at changeagent.nelrc.org/3
How Many Members of Congress for your State?

The total number of representatives is split among the states, based on their new populations. This process is called apportionment. If your community is not counted, you might lose representation in congress.

How Much Money for your State?

The U.S. government gives money to the states based on their population. Let’s say your state gets $2500 per person per year from the federal government. A family of five adds funding to your state:

\[
\begin{align*}
\text{\$2500} & \times 5 \quad \text{(people)} \\
\text{\$12,500} & \times 10 \quad \text{(years)} \\
\text{\$125,000} & 
\end{align*}
\]

In the example above, if a family of five were not counted, the state would lose $125,000 over 10 years. Do the math for your family. If you do not count your family, how much will your state lose?
BEFORE YOU READ: Why might some people feel it is not safe to fill out the census?

In the U.S., there are many different people from all over the world. Some of them feel afraid because they do not have documents. It is going to be difficult for the census to get an accurate count.

Last year, a friend from my country had a dream to live in the U.S. He left Haiti and went to Brazil. He worked there for six months and made enough money to travel. He took a bus from Brazil to Mexico and then he crossed into California.

Now he is in this country without any documents, but he is not the only one who comes to the U.S. this way. Millions of other people come to the U.S. this way. How will the census count all of these people? I say that this is an impossible feat.

I think many of these people will not feel safe enough to fill out the census. Anyone who is an immigrant probably feels uncomfortable. Physically you are in this country, but you may not be a legal citizen. Even if you are a legal citizen, some people treat you like you are not welcome here.

I feel that if more people understood the purpose behind the census, they may consider being counted, although not likely.

AFTER YOU READ:

1. How does the author answer the question he poses in the title? What does he think might change people’s minds about the census?

2. Now do the activities on pp. 6-7.

Shenayder D. Occius was born in Haiti. He lives in Lauderdale Lakes, FL. He attends Atlantic Technical College and is obtaining his GED. He lives with his parents.
Help Someone Understand Better

Shenayder says that people might consider being counted if they understood the census better. Collect details from the articles pp. 1-3 and sort them into the columns below. (Some spaces will be blank.) Then write a letter following the model below.

<table>
<thead>
<tr>
<th>Page Number</th>
<th>Benefit to you and your community of filling out census</th>
<th>Ways your information is protected</th>
<th>Consequences of not filling out the census</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Practice Asking and Answering Questions

1. Work with a partner. Think of a question that someone you know might have about the census. (You should be able to answer the question with the information from the articles on pp. 2-4.) Write down only the question on a piece of paper. Discuss the answer to the question, and be ready to share the answer verbally (but don’t write it down).

2. Now trade questions with another pair of students. Read the question on the piece of paper you received. Let the other students respond to the question. Then switch and let the other pair read a question, and you respond. (Note to the teacher: Since you have two students answering one question, they should take turns when they answer. One person could say something, and the second person could add more information if they can. Or the second person could say simply, “I agree with what she said,” and then repeat the information. The idea is to practice sharing information verbally. If students are comfortable, invite them to stand in front of the room. This makes the activity more dynamic and more of a role-play of what might happen in real-life.)

3. After everyone has a turn, write another question and repeat the process. Keep doing the process until all the main questions that you might develop from the text on pp. 2-4 have been answered.
Write a Letter about the Census

Fill in the blanks below to write a letter to someone you know. Or copy the whole letter on to a new piece of paper. If you are happy with the letter, consider sending it or giving it to the person. How did the person receive the letter? What was their response? Did they have more questions about the census? Bring those questions to class and work with your classmates to find the answers.

Date: ___________________

Dear ________________________,

It is your decision to fill out the census or not. In this letter, I will share what I have learned about it. Maybe it will help you make a decision.

First, there are some benefits to you and your community, including:

_____________________________________________________________________
_____________________________________________________________________
_____________________________________________________________________

Second, your information will be protected. There is a law called ____________
________________________________________________________. This law makes it illegal for the Census Bureau to share your private information.

Third, there are consequences to not filling out the census, including:

_____________________________________________________________________
_____________________________________________________________________
_____________________________________________________________________
_____________________________________________________________________

In conclusion, ________________________________________________________
_____________________________________________________________________
_____________________________________________________________________
_____________________________________________________________________
_____________________________________________________________________.

## Note to the Teacher

When students fill out this grid, they could practice note-taking skills by trying to paraphrase the details they are capturing from the article. Or they can copy the text. Here is a set of possible answers.

<table>
<thead>
<tr>
<th>Page Number</th>
<th>Benefit to you and your community of filling out census</th>
<th>Ways your information is protected</th>
<th>Consequences of not filling out the census</th>
</tr>
</thead>
<tbody>
<tr>
<td>2</td>
<td>• tells government how much money states should get for schools, hospitals, etc.</td>
<td>• the census does not ask about citizenship • Title 13 says Census Bureau cannot share information with anyone</td>
<td></td>
</tr>
<tr>
<td>3</td>
<td>• the census wants data so it can have a “big picture”; it is not concerned with individuals</td>
<td></td>
<td>• there won’t be another one for 10 years</td>
</tr>
<tr>
<td>4</td>
<td>• money will be distributed fairly to your state • you will get the correct number of representatives in congress</td>
<td></td>
<td>• you are breaking the law if you don’t fill it out • your community might not get services it needs • your community might not get enough representatives in congress</td>
</tr>
</tbody>
</table>
